

CONDOR[®] Custom Solutions

SHAPING EXCELLENCE

helpful. personal. professional.

Additive manufacturing / 3D laser sintering process

Respond flexibly to customers' wishes and go beyond expectations through remarkable speed and optimised components.

We can offer you new production opportunities with the laser sintering process. You will receive complex, cost-efficient components in no time at all. Respond more quickly to customers' wishes and market demands, and go beyond your customers' expectations with this high flexibility.

The benefits for you: It goes without saying that products of the highest quality are important to us as a company certified under DIN EN ISO 9001:2015 and DIN EN ISO 13485:2016.

We process the plastic PA12, which demonstrates outstanding product characteristics. Along with biocompatibility, PA 12 is also characterised by high stability and a wide variety of reprocessing possibilities.

Wire-eroding technology

Precision down to the tiniest detail

Condor® Custom Solutions can offer you wire-eroding technology at the highest level. We guarantee that your products will be of outstanding quality. The extensive know-how of our team and a state-of-the-art machine park offer the ideal conditions for this.

You will also benefit from low maintenance periods and the tools' high resistance against wear and tear. This is our promise of quality and service, which we will always keep - for a positive effect on your work.

Milling technology

High-quality results and partnership consultation are guaranteed for you at Condor® Custom Solutions.

We will execute jobs reliably and on time for you, and provide you with work results of the highest precision, quality and perfection. In light of constantly growing customer demands, milling technology

has grown into a high-technology area of application with all kinds of possible uses. Thanks to our 5-axis milling machines, controlled by state-of-the-art CAD/CAM systems, we can satisfy any demand.

Construction

Years of experience, innovation, flexibility.

We will support you throughout the entire development process of your project. In this way, you will benefit from our multi-disciplinary specialist knowledge.

Our wide range of services offers the ideal basis for creating a specific solution for you.

We want to improve, to make things better for you.
